INSTRUCTIONS TO CONVERT T130E1 TRACK TO T150F TRACK USING KIT 57K4269(2530-01-502-3401) ON M113A3 FOV CARRIERS, M113A2 FOV CARRIERS, M548A1/A3 CARRIERS AND OSV/MBT VEHICLES

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited

HEADQUARTERS, DEPARTMENT OF THE ARMY 28 FEBRUARY 2007

WARNING SUMMARY

WARNING SUMMARY

This is a summary of critical WARNINGs in this bulletin. They are repeated here to let you know how important they are. Study these WARNINGs carefully; they can save your life and the lives of personnel you work with.

Always wear eye protection when using a hammer. Eye injury may result if metal chips contact eyes.

Improper number of track shoes may prevent track from being adjusted correctly, creating a safety hazard. Personnel may be killed and equipment damaged. For carriers with new track, ensure there are 63 track shoes on the left side of carrier and 64 track shoes on the right side of carrier for the M113A2 FOV, M113A3 FOV and OSV. For the M548A1/A3, 66 track shoes are required for both sides.

WARNING

Do not use a crowbar on the track shoe pins to get leverage. Any scratches may cause the pin to break and cause the track assembly to fall off the vehicle while operating. This may kill soldiers and damage equipment. Use crowbar as shown in the following steps to get leverage to install the end connectors.

WARNING

Not getting the bolt tight enough may result in death to personnel and damage to equipment if the end connectors fall off during movement of the vehicle.

For first aid information, see FM 4-25.11.

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this publication. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Submit your DA Form 2028 (Recommended Changes to Publications and Blank Forms), through the Internet, on the Army Electronic Product Support (AEPS) website. The Internet address is http://aeps.ria.army.mil. If you need a password, scroll down and click on "ACCESS REQUEST FORM." The DA 2028 is located in the ONLINE FORMS PROCESSING section of the AEPS. Fill out the form and click on SUBMIT. Using this form on the AEPS will enable us to respond quicker to your comments and better manage the DA Form 2028 program. You may also mail, fax, or E-mail your letter or DA Form 2028 direct to: AMSTA-LC-LPIT Tech Pubs, TACOM-RI, 1 Rock Island Arsenal, Rock Island, IL 61299-7630. The e-mail address is ROCK-TACOM-TECH-PUBS@conus.army.mil. The fax number is DSN 793-0726 or Commercial (309) 782-0726.

SAFETY SUMMARY

GENERAL SAFETY INSTRUCTIONS.

This publication describes physical and chemical processes, which may cause injury or death to personnel or damage to equipment if not properly followed. This safety summary includes general safety precautions and instructions that must be understood and applied during operation and maintenance to ensure personnel safety and protection of equipment. Prior to performing any task, the WARNINGs, CAUTIONs and NOTEs included in that task shall be reviewed and understood.

WARNINGS, CAUTIONS, AND NOTES

WARNINGs and CAUTIONs are used in this publication to highlight operating or maintenance procedures, practices, conditions or statements, which are considered essential to protection of personnel (WARNING) or equipment (CAUTION). WARNINGs and CAUTIONs immediately precede the step or procedure to which they apply. WARNINGs and CAUTIONs consist of four parts: heading (WARNING, CAUTION, and ICON), a statement of the hazard, minimum precautions, and possible result if disregarded. NOTEs are used in this publication to highlight operating or maintenance procedures, practices, conditions or statements which are not essential to protection of personnel or equipment. NOTEs may precede or follow the step or procedure, depending upon the information to be highlighted. The headings used and their definitions are as follows.

WARNING

Highlights an essential operating or maintenance procedure, practice, condition, statement, etc, which, if not strictly observed, could result in injury to, long term health hazards for, or death of, personnel.

CAUTION

Highlights an essential operating or maintenance procedure, practice, condition, statement, etc, which, if not strictly observed, could result in damage to or destruction of equipment, or loss of mission effectiveness.

NOTE

Highlights an essential operating or maintenance procedure, condition, or statement.

INTRODUCTION

Purpose.

The purpose of this technical bulletin (TB) is to replace the T130E1 track assembly and install the T150F track assembly. Kit 57K4269 provides all the parts to modify the sprocket carrier 10942567 and provides the crew tools for installing/removing T150 track. The T150 track assembly is procured separately through your unit funds. The kit applies to the vehicles identified in Table 1. The kit is designed for either field or depot installation.

General.

- a. Priority. This bulletin is classified ROUTINE.
- b. End Item(s) or System(s) to be modified. Modification will be in accordance with Table 1.

- (3) Bulk and Expendable Material. Not Applicable.
- (4) Parts Disposition. Parts removed and not reinstalled are considered excess for kit application. Excess parts may be reused on another depot overhaul program or otherwise disposed of in accordance with AR 725-50 or local salvage regulations. T130 E1 track removed from vehicle will be inspected and classified IAW TM 9-2530-200-24 dated, March 2006. Refer to Table 1, listed in WP 0002 00.
- h. Special Tools; Tool Kits; Jigs; Test, Measurement and Diagnostic Equipment (TMDE), and Fixtures Required. Common hand tools (wrenches, sockets, screwdrivers); metal cutting tools (drill bits, taps, saws); and other tools (drills, grinders, shop equipment) are furnished by the maintenance shop/contractor.

REQUIRED COMMON TOOLS FOR INSTALLATION

- i. Modification Procedures. Refer to Modifications Procedures/Sequencing Work package for compliance.
- j. Calibration Requirements. No calibration is required of the modified vehicle.
- k. Weight and Balance Data. Weight and balance are not significantly affected.
- I. Quality Assurance Requirements.
 - (1) Perform Quality Assurance inspections to verify requirements of paragraph i, which define the minimum inspections to be performed. Documented Quality evidence of inspections performed and compliance with requirements will be accomplished as specified by the maintenance Quality activity.
 - (2) Inspection.
 - (a) In-process Inspection. Perform monitoring-type inspection of processes to assure compliance with requirements. The following items can only be monitored prior to completion of other steps.
 - <u>1</u> Ensure track assemblies for T150F track have correct number of track shoes (63 left side, 64 right side M113A2 FOV, M113A3 FOV and OSV; 66 left and right side M548A1/A3).
 - <u>2</u> Ensure rework of components is accomplished in their workstations IAW requirements of TB.
- m. Recording and Reporting of the Modification. Refer to DA Pamphlet 738-750.
 - (1) Marking Equipment. Not applicable.
- n. Material Change (MC) Number. Not applicable.
- o. Modification Identification. Not applicable.

END OF WORK PACKAGE

MODIFICATION PROCEDURES/SEQUENCING

THIS WORK PACKAGE COVERS:

GENERAL

Scope.

This work package provides shop instructions for the installation of T150F Track Assembly for carriers listed in Table 1 (WP 0001 00). If working on a M981 or M901A1 you will need to add four screws - B1821BH050C350N per vehicle to mount the track stowage brackets. The OSV does not have a stowage bracket for the spare track shoes at this time.

Facilities.

No special facilities are required other than that required for Unit/Direct/General Support maintenance. (See TM 9-2350-277-10 and -20 for M113A3 FOV; TM 9-2350-261-10 and -20 for M113A2 FOV; TM 9-2350-247-10 and -20 for M548A1/A3; or TM 9-2350-366-10-1 and -20-1 for OSV/MBT).

Tools and Equipment.

- a. Commonly used tools and equipment having application to unit maintenance, in general, will be furnished by the maintenance activity/contractor.
- b. Special tools and equipment having application to maintain M113A3 FOV carriers are listed in TM 9-2350-277-20 and TM 9-2350-277-24P, M113A2 FOV carriers are listed in TM 9-2350-261-20 and TM 9-2350-261-24P, M548A1/A3 carriers are listed in TM 9-2350-247-20 and TM 9-2350-247-24P, or OSV/MBT vehicles are listed in TM 9-2350-366-20-1 and TM 9-2350-366-24P-1 will be furnished by the unit/direct/general support activity/contractor.

0002 00

0002 00

CAUTION

If vehicle has older Sprocket Wheel PN 8763352 it is necessary to replace it with the current Sprocket Wheel PN 10942567 to convert to T150F track.

DISASSEMBLY

1. Removal of Components.

- a. The following paragraphs provide disassembly procedures to the extent necessary for installing T150F Track Assembly. Detailed procedures not contained herein may be found in applicable technical manuals (TM 9-2350-277-10 or -20 for the M113A3 FOV; TM 9-2350-261-10 or -20 for the M113A2 FOV; TM 9-2350-247-10 or -20 for the M548A1/A3; or TM 9-2350-366-10-1 or -20-1 for the OSV).
- b. Parts to be retained for rework or reuse during assembly, and parts considered excess during disassembly of the M113A3 FOV carriers, are identified by name and part number in the disassembly procedures. Dispose of excess parts IAW instructions from AR 725-50.
- c. Table 1 indicates parts that will be removed and reused, discarded, or considered excess, during disassembly/removal of T130E1 Track Assembly. The information to remove these items will be immediately following the table. The parts listed for reuse will be installed during assembly.
- d. Perform all disassembly and re-assembly steps for one track assembly. Then repeat all steps for the opposite side track assembly.
- e. The following reference tasks are equipment conditions required for disassembly (any unique tasks will be stated in the specific procedure):
 - (1) Vehicle on level surface.
 - (2) Engine stopped (see your -10).
 - (3) Vehicle blocked (see your -10)

0002 00

DISASSEMBLY - Continued

2. Stowage Items.

These items are to be removed and disposition of parts is as indicated on Table 1.

- a. Remove Stowed Track Shoe Assemblies.
 - (1) Remove four screws (B1821BH050C150N), flat washers (8763458), and two track shoe assemblies (11677988-6) stowed on the front of the vehicle.

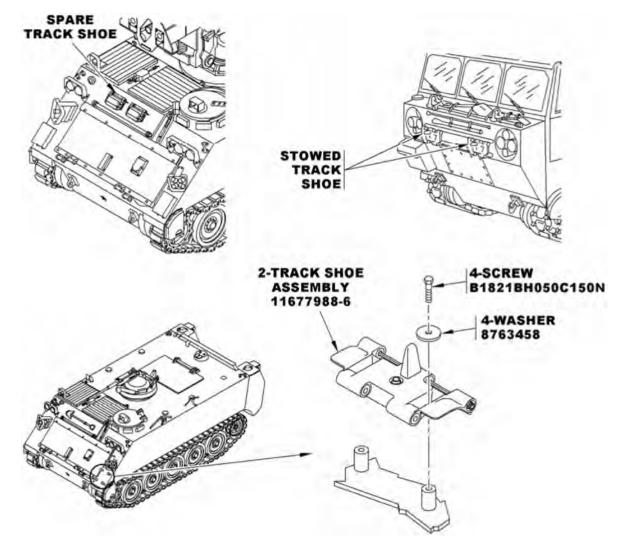

Figure 1. Remove Stowed Track Shoe Assemblies

DISASSEMBLY - Continued

b. Remove two T130E1 Track Assemblies and Sprocket Wheel Assemblies from vehicle.

NOTE

Procedures are for one side and should be repeated for opposite side.

- (1) Remove T130E1 track assembly from vehicle (see your -10). Track assembly is to be discarded. IAW TM 9-2530-200-24, dated March 2006.
- (2) Remove ten self-locking bolts (MS35764-1545) and two sprocket wheel assemblies from final drive assembly.
- (3) Remove 20 self-locking bolts (MS35764-1435), two sprockets (11678255), and two cushions

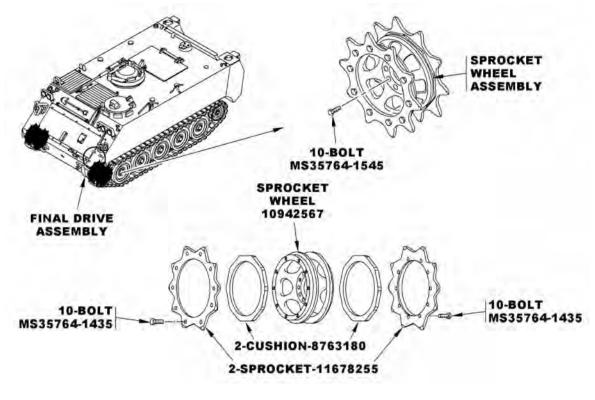

Figure 2. Remove One T130E1 Track Assembly and Sprocket Wheel Assembly from Vehicle

0002 00

ASSEMBLY

1. Installation of Components.

- a. General. Order of assembly of the vehicle will take place in the sequence shown in this TB. This will cover the components for installation of T150F Track Assembly.
- b. Procedures. The following pages will cover the procedures for describing the installation of components for installation of T150F Track Assembly.
- c. Follow-through steps to complete the TB maintenance will be described in Follow Through Steps.

Table 2. TRACK ASSEMBLY INSTALLATION COMPONENTS

ASSEMBLY - Continued

NOTE

Procedures are for one side. Repeat these steps for the opposite side.

- d. Install T150F track assembly sprockets on vehicle.
 - (1) Place two new rubber cushions (8763180) on sprocket wheel (10942567). Center short flat areas between mounting holes in sprocket wheel rim. Press on rubber cushions until firmly seated against flange of carrier.
 - (2) Install two rings (12474843), sprockets (12474840), and 20 self-locking bolts (MS35764-1445) on sprocket wheel. TORQUE BOLTS TO 110-115 lb-ft. (149-156 N m). Use torque wrench.
 - (3) Place sprocket wheel assembly on final drive. Secure with 10 self-locking bolts (MS35764-1545). Have helper assist. TORQUE BOLTS TO 170-190 lb-ft (231-258 N m). Use torque wrench.

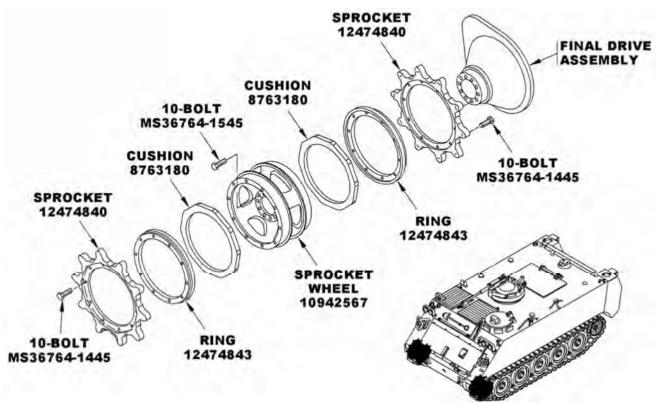

Figure 3. Install T150F Track Sprocket Wheel Assembly on Vehicle

ASSEMBLY - Continued

e. Install T150F Track Assembly on vehicle (Figure 4 through Figure 8).

Improper number of track shoes may prevent track from being adjusted correctly, creating a safety hazard. Personnel may be killed and equipment damaged. For carriers with new track, ensure there are 63 track shoes on the left side of carrier and 64 track shoes on the right side of carrier for the M113A2 FOV, M113A3 FOV and OSV. For the M548A1/A3, 66 track shoes are required for both sides.

CAUTION

Be sure track shoe orientation matches that of the adjacent shoe. Center guides can not be next to each other.

NOTE

Track assembly can be installed from front to back or back to front. Going from the back to front can be easier with the sprocket wheel assembly to help push the track assembly over the top of the road wheels. Joining the track together will be between the sprocket wheel assembly and first road wheel or idler wheels and last road wheel.

If connecting the track at rear of vehicle (M113A2 FOV and M113A3 FOV only), have ramp closed and secured (see your -10) to allow access under the vehicle.

- (1) Position track assembly with proper number of shoes in a line in front or rear of vehicle. Align track guides of track assembly between first pair of road wheels. If track shoes came in sections of five or eight track shoes, connect 63 track shoes together for the left of the carrier (all except M548A1/M548A3) and 64 track shoes for the right side of the carrier (all except M548A1/M548A3). For the M548A1/M548A3, make sure you have 66 track shoes for both left and right.
- (2) Remove two end connectors from track shoes, to be joined together..

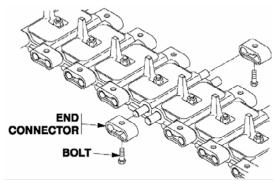

Figure 4. Install T150F Track Assembly on Vehicle

ASSEMBLY – Continued

- (3) Unblock vehicle (see your -10).
- (4) Have helper drive vehicle forward or reverse until track assembly positions on sprockets.
- (5) Have helper drive vehicle forward or reverse until track assembly is over idler wheels.
- (6) Hold track in position using crowbar. Hook track fixture to end connectors on either side of break. Install outside track fixture first, then install fixture to the inside of the track assembly.
- (7) Tighten two track fixtures evenly until ends of track are close enough to install end connectors.

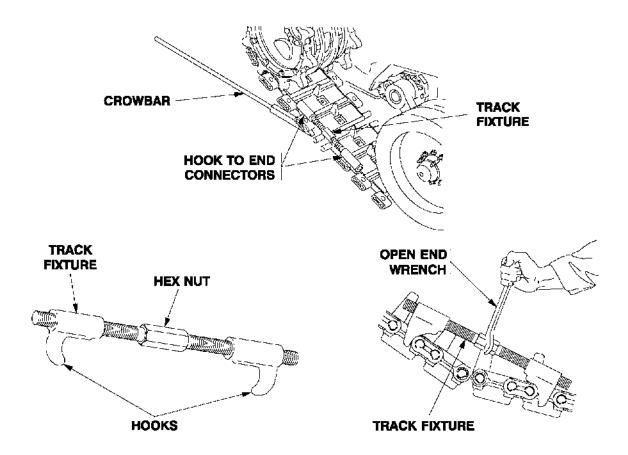

Figure 5. Install T150F Track Assembly on Vehicle

0002 00

ASSEMBLY - Continued

- (8) Place alignment track pin tool (12474881) over one pin on the outside track shoe and rest it on the other pin. Tighten both track fixtures evenly to pull the track assembly together until the alignment track pin tool fits over and seats fully on both track shoe's pins. Install the second alignment track pin tool on the inside track shoe pins.
- (9) Remove the outside track fixture. Both alignment track pin tools will hold the track together. Leave the other track fixture on the inside of the track shoe.

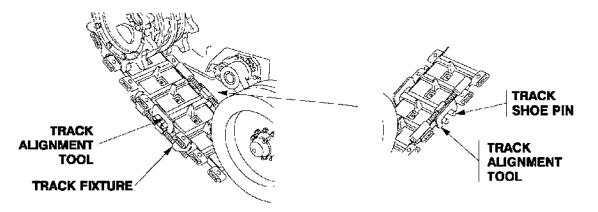

Figure 6. Install T150F Track Assembly on Vehicle

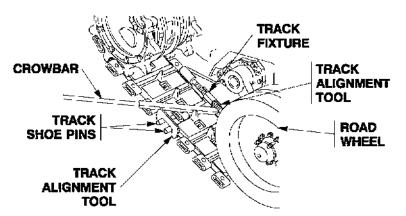

Do not use a crowbar on the track shoe pins to get leverage. Any scratches may cause the pin to break and cause the track assembly to fall off the vehicle while operating. This may kill soldiers and damage equipment. Use crowbar as shown in the following steps to get leverage to install the end connectors.

NOTE

Place end connector or similar size block on top of the two track shoes being joined. Use the crowbar under the track fixture connected to the inside track shoes end connectors and press down on the block/end connector to get the right angle to install the end connector.

(10) Make sure the inside track fixture is tight enough to allow the helper to use the crowbar under it with enough pressure to get the slight degree of angle between the two track shoes to allow installing the outside end connector. Use end connector or block to get the angle needed to install the end connector. Use end connector or block as leverage to get angle needed to install end connector.

ASSEMBLY - Continued

Always wear eye protection when using a hammer. Eye injury may result if metal chips contact eyes.

(11) Install the end connector on the outside track shoe pins. Get the angle needed to allow the end connector to fit on the track shoe pins. Using a hammer, tap on the end connector close to the alignment track pin tool. Remove the alignment track pin tool from the outside of the track shoe. Tap the end connector fully onto the track shoe's pins. Drive end connectors flush with pin ends, and install bolts on each end connector.

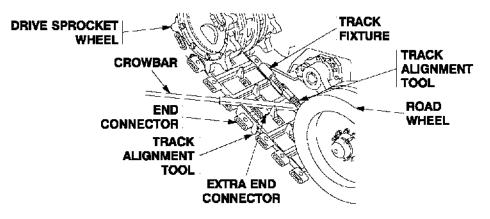

Figure 8. Install T150F Track Assembly on Vehicle

0002 00

ASSEMBLY - Continued

- (12) Install inside end connector. Only a slight amount or no leverage is needed to install the second end connector if the outside end connector is already installed.
- (13) With the end connector installed half way on the inside of the track shoe, remove the track fixture and alignment track pin tool. Finish installing the end connector flush with the pin ends.

WARNING

Not getting the bolt tight enough may result in death to personnel and damage to equipment if the end connectors fall off during movement of the vehicle. Torque each end connector bolt to the proper torque of 400-430 lb-ft(543-583 Nm).

NOTE

Mark the location of the end connectors so they can be torqued properly.

- (14) TORQUE END CONNECTORS' BOLTS TO 400-430 lb-ft (543-583 N m). Make sure to check every end connector bolt on the complete track assembly, even if it came in as a complete assembly.
- (15) Repeat installation procedures to the opposite side of the vehicle.
- (16) Adjust track tension (see your -10).
- f. Install T150F Spare Track Shoes and Brackets on vehicle (Figure 9).

Table 3. SPARE TRACK SHOE INSTALLATION COMPONENTS (OSV DOES NOT HAVE A STOWAGE LOCATION FOR THE SPARE TRACK SHOES)

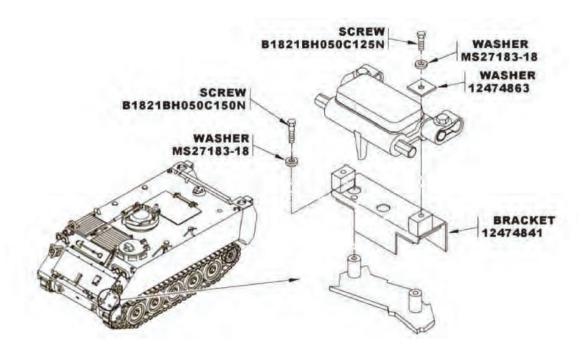

NSN	NOMENCLATURE	CAGEC	PART NO.	QUANITY
5340-01-496-5173	Bracket, Track, Stowage	19207	12474841	2
2530-01-496-4444	Track Shoe Assembly	19207	12474844	127or166
5310-01-497-2285	Washer, Flat, Square	19207	12474863	4
5305-00-071-2067	Screw, Cap, Hex	80204	B1821BH050C125N	4

5310-00-809-5998	Washer, Flat	96906	MS27183-18	8

Not included in the kit (replaces B1821BH050C150N). For M981/M901A1

5305-00-071-2077 Screw Cap Hex 80204 B1821BH050C350N 4					
	5305-00-071-2077	Screw, Cap, Hex	80204	B1821BH050C350N	4

ASSEMBLY - Continued

- Place two track stowage brackets (12474841) on vehicle. Secure with four flat washers (MS27183-18) and screws (B1821BH050C150N) all except the M981 and M901A1. For the M981 and M901A1, use four screws (B1821BH050C350N).
- (2) Install two track shoes (12474844-1) on two brackets and secure with four square flat washers (12474863), flat washers (MS27183-18), and screws (B1821BH050C125N).

FINAL INSPECTION

Final Inspection for T150F Track.

- 1. Adjust track tension (see your -10).
- 2. Verify ALL end connector bolts have been secured and torqued to 400-430 lb-ft (543-583 N m).
- 3. If final inspection is complete and correct, perform FOLLOW-THROUGH STEPS.

FOLLOW-THROUGH STEPS

- 1 Unblock vehicle (see your -10).
- 2. Road test vehicle to check that track is installed correctly (see your -20).

ASSEMBLY - Continued

WARNING

Not getting the bolt tight enough may result in death to personnel and damage to equipment if the end connectors fall off during movement of the vehicle. Torque each end connector bolt to the proper torque of 400-430 lb-ft(543-583 Nm).

- 3. CRITICAL SAFETY ITEM CHECK: After 30 to 60 miles of operation with new track, check torque on all end connector bolts. TORQUE TO 400-430 lb-ft (543-583 N m).
- 4. CRITICAL SAFETY ITEM CHECK: After 1500 miles of operation with new track reverse track (see your 20). This extends the life of the track. Keep a record of when track is installed/reversed.
