1. General.

The M915 Family of Vehicles (FOV), M915A3, M916A3 and M917A2s are warranted by their manufacturer, Daimler Trucks North America LLC, 4747 North Channel Ave., Portland, Oregon, 97217. Daimler Trucks warrants that the vehicles are free from defects in design, material and workmanship. This technical bulletin explains warranty coverage for the vehicles and how to file claims on those vehicles.

2. Explanation of Terms.

- a. Abuse. The improper use, maintenance, repair, or mishandling of warranted items that may cause the warranty of those items to become void.
- b. Acceptance Date. The date the equipment is accepted in the Army's inventory as annotated on the DD Form 250, Material Receiving and Inspection Report.
- c. Acquiring Command or Activity. An activity that procures the items or material for a user.
- d. Alterations/Modifications. Any alteration after production, such as retrofit conversion, remanufacture, design change, engineering change and the like.
- e. Defect. Any condition or characteristic in any supplies furnished by Daimler Trucks North America LLC that is not in compliance with the requirements of the contract or that does not function as intended.
- f. Reimbursement. A written provision in a warranty contract whereby the user may make the necessary repairs with or without approval of the contractor, and the Government will be reimbursed for the repair parts and/or labor costs.
- g. Repair. To restore an item to a serviceable condition without affecting warranty.
- h. Repairable. An item that may be reconditioned or economically repaired for reuse.
- i. Warranty. A written agreement between a contractor and the government that outlines the rights and obligations of both parties for defective supplies.
- j. Warranty Claim. Action started by the equipment users for authorized warranty repair or reimbursement.
- k. Warranty Period. Time during which the warranty is in effect.
- l. Warranty Start Date. The date the warranty is put into effect.

3. Coverage-Specific.

The vehicles are covered by a design, material and workmanship warranty. All components, interfaces and parts are covered under the basic vehicle warranty unless specifically identified herein. Daimler Trucks' basic warranty for the M915A3, M916A3, M917A2 covers a period of 24 months with coverage beginning on the date of vehicle acceptance (check the vehicle data plate for warranty start date). The vehicle warranty covers bumper to bumper on all parts/labor and workmanship for the M915A3, M916A3, M917A2. Warranty claims (parts and labor) must exceed \$50.00 to be submitted. Items excluded are parts that are subject to consumption during their

normal service life and are routinely replaced during normal maintenance service. These excluded items include, but are not limited to: brake linings, clutch brakes, clutch linings, filters (fuel, air, oil, water, and desiccant cartridges), fluorescent ballast and tubes, upholstery/floor mats, fuses, light bulbs and non-reusable sealed light assemblies, mud flaps, receiver-drier/suction accumulator, glass breakage and scratches and wiper blades. Other EXCLUSIONS from warranty would be routine maintenance services and adjustments, as defined in the applicable maintenance and driver's manual. Balancing of tires, alignment of axles and wheels including thrust angles, camber caster and tow settings. TIRES: The tire manufacturer provides a Warranty on the original tires provided on vehicle at delivery and acceptance. Appendix C of this Warranty TB provides additional information regarding the Michelin Tire Warranty.

If a safety defect occurs during the warranty period that deadlines a vehicle from operation, Daimler Trucks will extend the warranty for each affected vehicle by a period of time from notification of the deadlined status until the vehicle is corrected and made operable.

Any supplies corrected or replaced under the warranty will carry the same warranty as when the vehicle was originally delivered.

Replacement parts distributed by Daimler Trucks North America LLC will be free from defects in material and workmanship arising from normal use and service for 12 months. Replacement part warranty coverage is effective from the date of retail sale.

4. Contractor Responsibilities.

The vehicle contract provides you with two options (contractor repair or government repair) for correcting vehicle defects. The choice of options is in the hands of the local unit or installation.

- a. Contractor Repair. If you choose the contractor repair option, the contractor will give you a location where the vehicle or component may be taken for repair.
- b. Government Repair. You may choose to repair the vehicle yourself. If you choose to do the work yourself, the contractor will reimburse the Government for your labor. You may choose to use your own parts or you may request that the vehicle contractor provide you with replacement parts. If you use your own replacement parts, you may request replacement parts instead of reimbursement of the cost of the parts. If you do not specifically request replacement parts the contractor will reimburse the Government for the cost of parts. The contractor shall bear the cost of shipping parts within CONUS.

5. Government Responsibilities.

The US Army TACOM Life Cycle Management Command is the managing activity for the vehicles, contract, and warranty policy. Questions related to the general warranty policy should be directed to the TACOM Warranty Coordinator (SFAE-CSS-TV-H), Horace Holt, DSN 786-6426 or Commercial (586) 574-6426.

6. Government Maintenance/ Nullification.

Scheduled maintenance for the vehicles is contained in TM 9-2320-302-10 and TM Series 9-2320-302-20. The fact that the vehicles are covered by a warranty does not relieve the user of the responsibility for proper operation, care and maintenance of these vehicles. Failure to perform the services scheduled within the vehicle's technical manuals could cause your warranty to be void. Additionally, abuse of the vehicles or components could cause a warranty claim to be refused.

7. Alterations/Modifications.

Alterations and modifications shall not be made during the warranty period unless expressly directed by the Project Manager Heavy Tactical Vehicles (SFAE-CSS-TV-H).

8. Abuse Determination.

Daimler Trucks North America LLC does have the right to inspect returned parts as requested. Upon inspection, if the determination is made that the part has been abused, Daimler Trucks will notify the government in writing to advise of the finding. All parts related to any warranty repair must be retained for 30 days from the claim processing date or until notification of disposition is received.

9. Abuse Avoidance.

The government is responsible for advising all commands of abuses as they become aware of them, and the proper steps to be taken to avoid future abuses.
